

The box plot displays the distribution of the number of visits for two groups. The 'No visit' group (grey) has a median of approximately 5.5, with a box spanning from about 4.5 to 7.5. The 'Visit' group (red) has a median of approximately 4.5, with a box spanning from about 3.5 to 6.5. Both groups show a distribution of data points with whiskers extending to the minimum and maximum values.
