

The figure displays two box plots side-by-side, representing the distribution of 'number' for two categories: 'none' (gray) and 'some' (pink). The y-axis represents the 'number' values, ranging from 0 to 10. The 'none' group (gray) has a median around 1.5, with a box spanning from approximately 0.5 to 3.5. The 'some' group (pink) has a median around 2.5, with a box spanning from approximately 0.5 to 4.5. Both distributions are right-skewed, with many data points clustered at lower values and a few high outliers. The 'some' group shows a higher range of outliers, extending up to 10, while the 'none' group's outliers reach up to 9.

A horizontal number line with tick marks at 0 and 1. A vertical tick mark is drawn at the midpoint, labeled 0.5.
